INTRODUCTION

Congratulations on purchasing your Geemarc CL8350 telephone. This telephone is also hearing aid compatible. It offers many functions such as an alarm, a calendar, SMS text messaging, a phone book, handsfree speakerphone, an automatic keylock and speed dial buttons. It has an emergency function in which five numbers can be programmed as emergency contacts and in case of emergency these contacts will be called with the flick of just one switch.

The font size on the LCD display is large and the buttons on the keypad are easy to see and use. This mobile telephone has a loud ringer and speakerphone and strong vibrating setting. All these features add up to make this a highly suitable telephone for the elderly, hard of hearing or sight people and anyone who simply wants to keep in touch with a great degree of ease.

Its is important that you read the instructions below in order to use your Geemarc telephone to its full potential. Keep this user guide in a safe place for future reference.

This guide explains how to use the following telephone:
GSMCL8350

INTRODUCTION

Unpacking the Telephone

When unpacking the telephone, you should find the following in the box:

- 1 CL8350 mobile telephone handset
- 1 Desktop charging unit
- 1 Mains power adaptor

Bluetooth is connected

Menu Navigation

M1 and **M3** are softkeys i.e. they take on different functions depending on the menu displayed on the LCD. The current function is always displayed by the text above the key.

The **MENU** soft key is used to activate the menu. The **BACK** soft key is used to go back a level in the menu system. Press to deactivate the menu and return to standby mode from any menu.

The ▲ and ▼ keys are used to scroll through the menu.

DESCRIPTION

The **OK** soft key is used to confirm/ select an action or choice on a screen.

Normally, the submenus and the options have the shortcut numbers. Input the shortcut number of the submenu in the list, the relevant option will be displayed.

The **+** and **-** keys on the left hand side of the telephone are also used to scroll through options within menus.

SETTING UP

Network Services

To use this mobile telephone you must subscribe to a service from a wireless service provider. Different service providers offer different features (at a variety of charges). This may effect the features made available to you through the mobile telephone.

Passwords

This mobile telephone allows you to set up passwords to help protect your telephone from unauthorized use.

The PIN and PIN2 codes are supplied with your SIM card. The PIN code hellps to protect the SIM card from unauthorized use. The PIN2 code is required to access certain services.

The PUK and PUK2 codes may be supplied with the SIM card. If you enter the PIN code incorrectly three times in succession, the PUK will be required. If the codes are not supplied, contact your service provider.

SETTING UP

Install SIM Card and Battery

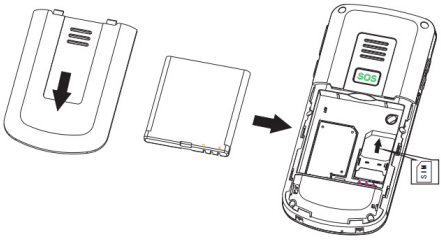
The rechargeable battery pack is supplied with your mobile phone. Insert the battery and valid SIM card before using the phone.

Always switch the telephone off and disconnect the charger before removing/inserting the battery or SIM card. Take care when handling the SIM card. The SIM card and its contacts can be easily damaged by scratches or bending.

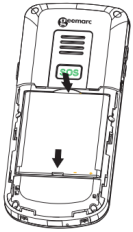
To remove the battery compartment cover, press down and slide the cover off completely.

Remove the battery (if battery already inside)

Slide the SIM card with the gold coloured contacts face down into the SIM card holder.



Observe the battery contacts (the gold coloured contacts must face towards the bottom right).and insert the battery.



Slide the back cover back into place.

Charging the battery

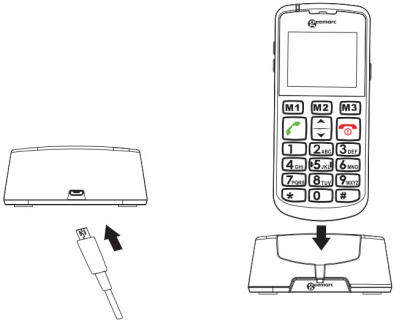
Charging via the Charging Unit
Plug the charger into a wall socket.

Connect the lead from the charger into the the socket on the back of the charging unit.

Place the mobile telephone onto the charging unit. The battery indicator on the LCD will fill and empty whilst charging.

When the battery is fully charged, the indicator will remain full and stop flickering.

SETTING UP



Note: Only use batteries and chargers supplied with the telephone. The guarantee will be invalid if an unapproved cable is used. Keep the battery contacts clean and free of dirt. Try and avoid removing the battery as this could short circuit the battery.

If the battery is completely discharged, it may take a few seconds before the charging indicator appears on the display or before any calls can be made (the telephone may be used during the charging process)

Before the handset can be used, the battery must be charged for a minimum of 4 hours.

After inserting the SIM card and charging the battery, the mobile will search the registered network or any other

available networks. Once connected, the name of network supplier will show in the middle of the LCD.

Note: If **'emergency call only'** is displayed on the LCD, you are out of range for a network service. However, you can still make emergency calls according to the signal strength.

Battery Use

The icon is continuously displayed at the top right corner of the LCD display. The icon indicates the level of battery power. The more bars displayed, the more power available.

When the battery charge is low, a warning message will be displayed **'Charge the battery'**. The back lighting and certain other functions may cease to work. When the battery is too weak for the telephone to operate, the handset will automatically switch off.

The battery talk and standby times are subject to change. Replace the battery when its power has deteriated noticeably.

SETTING UP

Switching On/Off

Press for 3 seconds or longer to switch the telephone on.
WELCOME will be displayed on the LCD (dependant on settings).

If no SIM card has been inserted, **LIMITED SERVICE** will be displayed. Only emergency calls can be made until the SIM has been inserted.

Press again for 3 seconds to switch the telephone off. **GOODBYE** will be displayed then the display disappears (dependant on settings).

USING THE TELEPHONE

Standby Mode

When the telephone is ready for use and you have not entered any characters, the telephone is in standby mode. You can set the telephone to standby mode by pressing .

Energy Saving Mode

Your telephone has an energy saving mode in order to save battery power in the standby mode when no keys are pressed. The display will switch off. Press any button to re-activate standby.

Making a Call

Dial the number on the keypad.

Press **CLEAR** soft key to delete an incorrect digit

Press , the number is automatically dialled

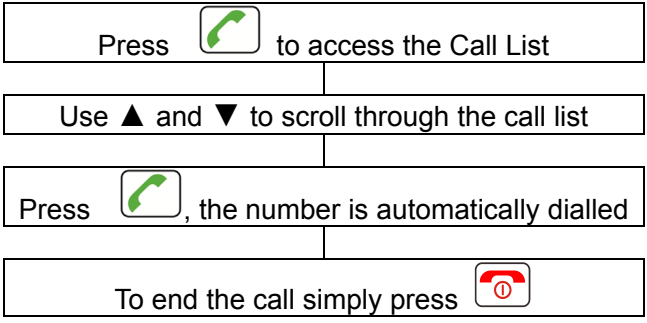
To end the call simply press

To place an international call you need to press a „+“ before the country code, which you get by pressing

the „*“ key twice. Some foreign telephone networks have extension lines that cannot be dialled as dial-through, but need to be entered by the keypad. To dial these directly, press the „*“ key quickly three times in a row after the telephone number. The „p“ character appears and then you can enter the dial extension.

Making a Call from the Call List

You can find numbers dialled, received or missed in the call list.



Making a Call from the Phone Book

If you have stored numbers in the phone book, you can dial numbers using the phone book.

Press **Names** soft key to activate the Phone book

Use ▲ and ▼ to scroll through the phonebook or type in the first letter of the name required and your search will be filtered to all contacts starting with that letter. If you type the second letter of the contact, your search will be further filtered to all contacts starting with those two letters etc

Press , the number is automatically dialled

To end the call simply press

Making a Call using Quick Dial

If you have stored numbers in the quick dial location, long-press either **M1**, **M2** or **M3** (dependant on who you wish to ring) for 3 seconds. The chosen telephone number will be dialled automatically.

Receiving a Call

When an incoming call is received the telephone rings and/or vibrates. The caller's telephone number will be displayed. If this caller's number is stored on the Phonebook, the associated name will be displayed

Press to answer

To end the call simply press

An alternative way to answer is press **Answer** to answer.

Rejecting a Call

When an incoming call is received the telephone rings. The caller's telephone number will be displayed. If this caller's number is stored on the Phonebook, the associated name will displayed

To reject an incoming call, simply press or **SILENT** then **REJECT**

Note: if the headset is inserted, you can receive the call with headset. If auto answer function is on, and the headset is inserted, the call will be auto answered after 2 seconds

Hands Free

You can turn on the speakerphone built into the telephone during a call. In this mode there is no need to hold the handset. You will hear the third party through the speaker and the microphone will pick up your voice.

During a call, press **H-FREE** soft key

To switch hands free off, press **H-HELD** soft key

End Single Call

You can end the call if required

During a call, press **OPTION** soft key

Use ▲ and ▼to scroll through the menu to select
END SINGLE CALL

Select the **OK** to confirm

Start a New Call

You can make a second call while your initial call is placed on hold (if your service provider allows)

During a call, press **OPTION** soft key

Use ▲ and ▼to scroll through the menu to select
NEW CALL

Dial the number on the keypad.

Press , the number is automatically dialled

Phoneboook

You can browse the phonebook during a call

During a call, press **OPTION** soft key

Use ▲ and ▼to scroll through the menu to select
PHONEBOOK

Use the phonebook as described in the phonebook chapter

Write an SMS

You can write/edit an SMS during a call

During a call, press **OPTION** soft key

Use ▲ and ▼to scroll through the menu to select
MESSAGES

Write or edit an SMS text

Mute Function

If you wish, you can speak privately to someone else in the room with you without your caller overhearing. You will still be able to hear the caller but they cannot hear you during the mute operation.

During a call, press **OPTION** soft key

Use ▲ and ▼to scroll through the menu to select
MUTE. This can be toggled on or off.

Select either the **On** or **Off** Soft key to activate/deactivate the mute

DTMF Tones

During a call, press **OPTION** soft key

Use ▲ and ▼to scroll through the menu to select **DTMF**

Select either the **On** or **Off** Soft key to activate/deactivate the DTMF tones

Receiving Volume and Tone

During a conversation, the and keys on the left or the up and down navigation keys will adjust the ear piece volume level. Alternatively, press the **Boost** key to switch amplify on/off. There are three tone settings: soprano/bass/alt. Base is the default setting. You can toggle between these settings using the **TONE** key on the right hand side of the telephone.

Call Timer

Your handset automatically times the duration of every external call. The time is shown during the call and for a few seconds after the call has ended.

MESSAGES

Send a Text Message

A text message using this telephone can contain up to 160 characters, this includes spaces.

Press **MENU** soft key to activate the menu

Use ▲ and ▼to scroll through the menu to select **MESSAGES**

Press **OK** soft key to select

Press **OK** soft key to select **WRITE MESSAGE**

Enter the text message using the numeric keypad (see Phone book Chapter about entering text using the numeric keypad)

Press **OPT** soft key. If you wish to insert templates, name or phone number – now is the time to do it.

1) Select **SEND TO** followed by **OPT** soft key. Dial the number or **SEARCH** for required number using the Phone book

2) Select **SAVE to drafts** followed by **Select** soft key. Dial the number or **SEARCH** for

required number using the Phone book. The text is saved in the **OUTBOX**

While you are writing your message, you can press the # key to switch the input method.

Receiving a Text Message (Inbox)

On receiving a text, a ringing tone will be audible (see Profiles Chapter on how to set ring tone). **NEW MESSAGE UNREAD** will be displayed on the LCD.

Press **VIEW** soft key to display the message

Reviewing Stored Text Messages (Inbox)

Press **MENU** soft key to activate the menu

Use ▲ and ▼to scroll through the menu to select **MESSAGES**

Press **OK** soft key to select

Use ▲ and ▼to scroll through the menu to select **INBOX** (received text messages are stored in the Inbox)

Press **OPTION** soft key to see all the options

available that can be performed on this selected text message.

These options include **VIEW**,**REPLY, ADVANCED**, **CALL SENDER**, **FORWARD**, **DELETE, COPY, MOVE TO PHONE, DELETE ALL, COPY ALL, MOVE ALL**

Outbox

You can check the messages you have saved in the outbox. These maybe sent or unsent. Options available are View, Resend, Delete, Edit, Delete all Advanced, Copy to phone, Move to phone, Copy all, Move all.

Templates

You can set some common templates for ease of use. You can create a new template or edit or delete existing templates.

SMS settings

SIM card: you have the possibility to set the Validity Period, message type, delivery report, replay path and the voicemail server number.

Save sent message

Memory status

Preferred storage

Voicemail Server

Any voicemails you may have received are saved on the network. You have to dial the number of the mail box to access your voicemail messages. You can enter the voicemail mail box number via this Voicemail Server option. You could access at your Voice mail server in press and hold the key one for 3 seconds.

PHONEBOOK

Telephone numbers and names can be stored in the phonebook. This is held both on the SIM and in the phone memory. If you are storing the contact details on the phone you can also store other details such as home number, office number, caller ringtone. Phonebook allows you to store frequently used numbers so that you can easily make a call without having to remember or enter the telephone number. You can search and recall numbers in order to make a call, create a message or use an entry as an emergency contact. The phone book in the phone memory can contain 300 entries. If you try to add a new entry when all the memory is filled, a warning message will be displayed. You will need to delete an existing entry in order to add the new telephone number. The contacts saved in the SIM card memory are indicated by **SIM** (capacity of the SIM storage depends on the SIM itself). The advantage of saving to SIM means you can transfer the information to another telephone (the capacity of the SIM will depend on the SIM being used).

PHONEBOOK

Create a Phonebook Entry

Press **NAMES** soft key to activate the Phonebook

Press **OPTIONS** and use ▲ and ▼to scroll through the menu to select
ADD NEW CONTACT

Press **Select** soft key to select

Option to Save to Sim or Phone

Enter the name using the numeric keypad

Use ▲ and ▼to scroll through the menu to select the next field of information to enter e.g.
NUMBER

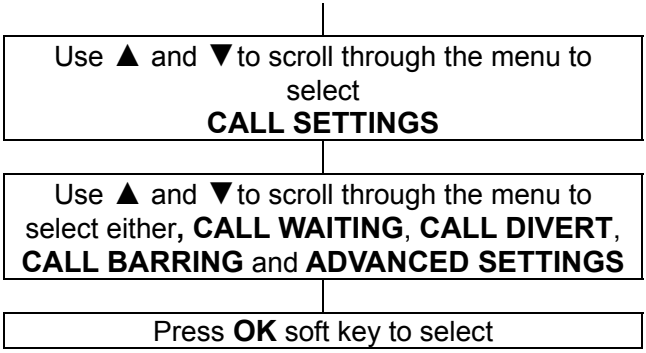
You can access the call settings as shown below followed by a description of each call setting available.

Press **MENU** soft key to activate the menu

Use ▲ and ▼to scroll through the menu to select
CALL CENTER

Press **OK** soft key to select



Call Waiting
Call waiting can be activated or deactivated. Please check that this service is available from your service provider. You can **QUERY STATUS** to find out if your service provider offers this service.

Call Divert
Incoming calls can be diverted to a specified telephone number (voicemail number generally). There are 5 options available with this function:

- Divert all voice calls: call divert in all conditions.
- Divert if unreachable: call divert when you cannot be contacted
- Divert if no answer: call divert when there is no answer

- Divert if busy: call divert when the line is busy
- Divert all data calls: call divert when it is data calls
- Cancel all diverts: cancel all the call divert

Call Barring

Incoming and outgoing calls to and from your phone can be limited. There are 2 options available with this function:

- Bar all outgoing calls

3 options available:
All voice calls
International voice calls
International voice calls except to home

- Bar all incoming calls

You can cancel all barring (the password is required for this). The password by default is 1122.

Advance Settings

- Black list: Set the numbers you don't want to answer in the black list, you can specify up to 20 numbers
- Auto redial: If this setting is activated, when you make a call but cannot get through as the other line is engaged, your telephone will automatically redial this number after a certain amount of time.

This will take place provided you have not cancelled the call.

- Call time display: whether to display the call duration.
- Call time reminder: You can estimate the call duration accurately by activating the prompt. There are 3 options, off, one sound and sound periodically.

SOS SETTINGS

Once you have pressed the SOS button at the back of the phone for 2-3 seconds, an alarm will be set off instantly. Meanwhile, the phone will make calls automatically to the predefined emergency contacts one by one. The moment the phone is connected, the alarm will stop immediately, and the conversation can begin.

Once connected, there will be a pre-recorded voice message as follows: “this is emergency call, Please press “0” to make sure.”
If “0” is pressed, a conversation can begin. Alternatively it will conclude after 30 seconds and the next number on the list will be dialled until one person press on the key 0.

When your helper presses “0” once connected, it will dial this cycle number after hook off. If he presses another “1” or “2”, it will conclude this cal after 30 seconds. After calling, it will send messages to preset emergency contacts one by one (send out the phone position coordinates).

Press **MENU** soft key to activate the menu

Use ▲ and ▼to scroll through the menu to select **SOS SETTINGS**

Press **OK** soft key to select

SOS Settings

SOS mode setting
There are 3 modes:
Set 5 numbers: The SOS function use the 5 SOS numbers to contact the different persons.

TROUBLESHOOTING

Telephone cannot be switched on

- Check battery is inserted and check that it is inserted correctly

Nothing appears on the display

- Check the handset is switched on
- Check the battery and SIM are inserted correctly

Display is locked when the telephone is switched on

- Enter the PUK to unlock the SIM

No signal icon is displayed

- There is no network connection. Move around to try and get to an area where there may be coverage
- Contact your service provider

Message to say that a function is not possible

- Your service provider might not provide the function in question or you may need to subscribe to that service. Contact the service provider.

No display during the charging process

- The battery charge is very low. Wait a few minutes.

“Insert Sim” or “Limited Service” message is displayed

- Ensure the SIM is inserted correctly

The battery is discharged quickly or cannot be charged at all.

- Charge the battery for 4 hours

- Place the phone correctly in the charging unit or connect the charging unit properly. Clean the contact surfaces on the mobile phone and charging unit with a soft, dry cloth.
- Try a new battery

Failure to link to the network

- The signal is too weak, or there may be some radio interference
- Is the SIM card installed incorrectly or damaged? If the SIM card is damaged, please ask your service provider for a replacement.

Cannot make a Call

- Is the SIM card registered to the network
- Is the bar outgoing calls feature enabled
- There may be a problem with the network, call your service provider
- Check the service provider number, local area number or NMC number (see Handset Settings)

Cannot answer a call:

- Is the bar incoming calls feature enabled
- Is the call diverting function enabled

The keys appear to be locked

- Power the phone off and then on
- Unlock the keylock

Caller Number is not displayed

- Ensure you have subscribed to the Caller ID service. Contact your service provider

- The caller may have withheld their details
- Let the phone ring a few times as there may be a delay in receiving the Caller ID information

Any problems not referred to above

- Check through the User Guide
- Power off and then on again. Check to see if the problem persists

SAFETY INFORMATION

General

Only use the power supply included with the product.

Only use the approved rechargeable battery supplied.

Do not open the handset (except to replace the handset batteries) or base. Contact the helpline for all repairs.

Never dispose of batteries in a fire. There is a serious risk of explosion and/ or the release of toxic chemicals.

If you are sure you are not going to use the telephone for over a month, remove the battery

Cleaning

Clean the telephone with a soft cloth. Keep the base and handset charging contacts clean. Never use polishes or cleaning agents - they could damage the finish or the electrics inside.

Environmental

Do not expose to direct sunlight.

Always ensure there is a free flow of air over the surfaces of the telephone.

SAFETY INFORMATION

Do not place any part of your product in water and do not use it in damp or humid conditions e.g. bathrooms. Do not expose your product to fire or other hazardous conditions.

The telephone is designed for working within a temperature range of -20°C to 60°C.

Usage

In summary, read these simple guidelines. Not following them may be dangerous or illegal.

SWITCH ON SAFELY

Do not switch the device on when wireless phone use is prohibited or when it may cause interference or danger.

ROAD SAFETY COMES FIRST

Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety.

INTERFERENCE

All wireless devices may be susceptible to interference. This could affect performance.

SWITCH OFF IN HOSPITALS

Follow any restrictions. Switch the device off near medical equipment.

SWITCH OFF IN AIRCRAFT

Follow any restrictions. Wireless devices can cause interference in aircraft.

SWITCH OFF WHEN REFUELLING

SAFETY INFORMATION

Do not use the device at a refueling point. Do not use near fuel or chemicals.

SWITCH OFF NEAR BLASTING

Follow any restrictions. Do not use the device where blasting is in progress.

USE SENSIBLY

Use only in the normal position as explained in the product documentation.

BACK-UP COPIES

Remember to make back-up copies or keep a written record of all-important information.

CHARGING

Do not use the telephone during charging

HEARING AID INFORMATION

Some phones are measured for compatibility with hearing aids. If the box for your particular model has "Rated for Hearing Aids" printed on it, the following explanation applies. When some mobile phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate. The wireless telephone industry has developed ratings for some of their mobile phones, to assist hearing device users in finding phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label on the box. The ratings are not guarantees. Results will vary depending on the user's hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

NETWORK SERVICES

To use the phone you must have service from a wireless service provider. Many of the features in this device depend on features in the wireless network to function. These network services may not be available on all networks or you may have to make specific arrangements with your service provider before you can utilize network services. Your service provider may need to give you additional instructions for their use and explain what charges will apply. Some networks may have limitations that affect how you can use network services. For instance, some networks may not support all language-dependent characters and services.

Your service provider may have requested that certain features be disabled or not activated in your device. If so, they will not appear on your device menu. Your device may also have been specially configured. This configuration may include changes in menu names, menu order and icons. Contact your service provider for more information.

GUARANTEE

From the moment your Geemarc product is purchased, Geemarc guarantee it for the period of two year. During this time, all repairs or replacements (at our discretion) are free of charge. Should you experience a problem then contact our help line or visit our website at www.geemarc.com. The guarantee does not cover accidents, negligence or breakages to any parts. The product must not be tampered with or taken apart by anyone who is not an authorized Geemarc representative. The Geemarc guarantee in no way limits your legal rights.
