# 1. IMPORTANT SAFETY INSTRUCTIONS

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury, including the following:

- 1. Read and understand all the instructions.
- 2. Follow all warnings and instructions marked on the product.
- 3. Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
- 4. Do not use this product near water (for example, near a bath tub, kitchen sink, swimming pool).
- Do not expose the telephone to direct sunlight or extreme cold environment. Do not put the telephone close to a heating source such as radiators, cookers, etc.
- Do not overload wall outlets and extension cords as this can result in the risk of fire or electric shock.
- 7. Unplug this product from the wall outlet and refer servicing to the distributor under the following conditions:
  - When the power supply cord or plug is damaged or frayed.
  - If the product does not operate normally by following the operating instructions.
  - If the product has been dropped and the cabinet has been damaged.
  - If the product exhibits a distinct change in performance.
- 8. Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.
- 9. Do not use the telephone to report a gas leak in the vicinity of the leak.
- 10. Use only the supplied NiMH (Nickel Metal Hydride) battery pack! The operation periods for the handsets are only applicable with the default battery capacities
- 11. The use of other battery types or non-rechargeable batteries/primary cells can be dangerous. These may cause interference and/or unit damages. The manufacturer will not be held liable for damage arising from such non-compliance.
- 12. Do not use third party charging bays. The battery may be damaged.
- 13. Battery should not be exposed to excessive heat such as bright sunshine or fire and immersed in water.
- 14. For pluggable equipment, the socket-outlet (power adaptor) shall be installed near the equipment and shall be easily accessible.

#### **Disposal warning**

- 1. When this crossed-out wheeled bin symbol is attached to a product, it means the product is covered by the European Directive 2012/19/EU.
- All electrical and electronic products/battery should be disposed of separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities.
- 3. The correct disposal of your old appliance/battery will help prevent potential negative consequences for the environment and human health.

For more detailed information about disposal of your old appliance/battery, please Contact your city office, waste disposal service or the shop where you purchased the product.

# 2. SET UP THE TELEPHONE

# 2.1 Package Contents

The package contains the following items:

- Base station
- Corded handset
- Cordless handset
- Charger with an AC power adapter
- AC power adapter (for base unit)
- NiMH rechargeable battery pack (for handset)
- Telephone line cord (for base unit)
- User's manual

# 2.2 Location

For maximum coverage and reduce the interference, here are some guidelines you should consider when you place the base unit,

- place it at a convenient, high, and central location with no obstructions between the handset and base unit in an indoor environment.
- place it away from electronic appliances such as televisions, microwave ovens, radios, personal computers, wireless devices or other cordless phones.
- avoid facing radio frequency transmitters, such as external antennas of mobile phone cell stations.
- avoid plugging it into the same circuit as other major household electrical appliances because of the potential for interference. Try moving the appliance or the base unit to another power outlet.

If the reception for a base unit location is not satisfactory, move it to another location for better reception.

Depending on the surrounding conditions as well as spatial and structural factors, the range may be reduced. The range indoors is normally less than outdoors.

# 2.3 Connect the Corded Base Station

Plug one end of the telephone line cord into a telephone jack or a DSL filter.

If you have DSL highspeed Internet service, a DSL filter (not included) is required.

Route the telephone line cord through this slot.

Click the wall mount bracket securely into the mounting slots for tabletop use.

Plug the other end of the telephone line cord into the telephone jack on the back of the telephone base.

- Plug the large end of the telephone base power adapter into a power outlet.

Route the power adapter cord through this slot.

Plug the small end of the telephone base power adapter into the power adapter jack on the back of the telephone base.

Plug the corded handset cord into the corded handset jack on the back of the telephone base.

#### NOTE

• Use only the power adapter supplied with the base station.

#### 2.4 Install and Charge the Handset Battery

1. Plug the battery connector securely into the socket inside the handset battery compartment. Insert the supplied battery as indicated.

2. Align the cover flat against the battery compartment, and then slide it upwards until it clicks into place.

3. Charge the handset by placing it face forward in the charger. You hear a beep when the handset is charging in the charger.

#### NOTES

- Use only the supplied NiMH rechargeable battery pack.
- If you do not use the handset for a long time, disconnect and remove the battery to prevent possible leakage.

# 2.5 Base Station Installation options

Your telephone base is ready for tabletop use. If you want to mount your telephone on a wall, follow the steps to connect the telephone base with a standard dual-stud telephone wall mounting plate. You may need a professional to install the mounting plate.

#### 25.1 Tabletop to Wall Mount Installation

- 1. Unplug the power adapter from the power outlet. Unplug the telephone line cord from the wall jack (or DSL filter).
- 2. Put the corded handset aside. Hold down the switch hook on the telephone base, and then slide the handset tab upwards to remove it from the slot. Rotate the handset tab by 180 degrees. Then, replace the handset tab into the slot until it locks into position.
- 3. Press down on the tabs of the wall mount bracket to release it from tabletop orientation.
- 4. Rotate the wall mount bracket down and push it into the telephone base until it clicks into place.
- 5. Plug the telephone line cord (or DSL filter) into the wall jack. Plug the power adapter into a power outlet. Align the slots on the back of the telephone base with the studs of the wall mounting plate.
- 6. Slide the telephone base down until it locks securely. Bundle the telephone line cord and power adapter cord neatly with twist ties.

#### 2.5.2 Wall Mount to Tabletop Installation

- 1. Unplug the power adapter from the power outlet. Unplug the telephone line cord from the wall jack (or DSL filter). If the telephone line cord and power adapter cord are bundled, untie them first. Push the telephone base up to remove it from wall.
- Put the corded handset aside. Hold down the switch hook on the telephone base, and then slide the handset tab upwards to remove it from the slot. Rotate the handset tab by 180 degrees. Then, replace the handset tab into the slot until it locks into position.
- Gently pull upward to release the wall mount bracket. Rotate the wall mount bracket up to tabletop position and push it into the telephone base until it clicks into place.
- Plug the telephone line cord (or DSL filter) into the wall jack. Plug the power adapter into an power outlet. Bundle the telephone line cord and power adapter cord neatly with twist ties if necessary.

- 5. Press MENU/OK and ▲/▼ to select DEFAULT.
- 6. Press MENU/OK and enter the 4-digit system PIN (default PIN is 0000).
- 7. Press MENU/OK to confirm.

#### 9.5.6 Set the Answer Delay

You can set the number of rings before the answering machine answers and starts playing your OGM. You can set the answering machine to answer after two to eight rings or TIME SAVER.

The TIME SAVER function answers calls after 6 ring signals, until the first new message has been registered - then the answering machine switches to answering after approximately 2 signals. This is useful when using remote access; if you call up the answering machine and there is no reply after four rings that means there are no messages recorded and you can hang up before you are charged for the call.

#### Using a handset:

- Press and ▲/▼ to select ANSWER DELAY (Available options: 2 RINGS, 4 RINGS, 6 RINGS, 8 RINGS or TIME SAVER).
- 4. Press  $\bigcirc$  and  $\checkmark/\bigtriangledown$  to select your desired answer delay.
- Press sto confirm.

- 1. Press MENU/OK and ▲/▼ to select ANS. MACHINE.
- 2. Press MENU/OK and ▲/▼ to select TAM SETTINGS.
- 3. Press MENU/OK and ▲/▼ to select ANSWER DELAY.
- 4. Scroll **MENU/OK** and **▲/**▼ to select the desired answer delay.
- 5. Press MENU/OK to confirm.

### 9.5.7 Set the Recording Time of Incoming Message

You can set the maximum length of the recording time of the incoming messages.

#### Using a handset:

- 2. Press and ▲ ★ to select TAM SETTINGS.
- 3. Press () and ★ ★ to select **RECORD TIME**.
- Press and to select your desired recording time (Available options: 60S, 120S, 180S, or UNLIMITED).
- 5. Press 📼 to confirm.

#### Using the base:

- 1. Press MENU/OK and ▲ ▼ to select ANS. MACHINE.
- 2. Press MENU/OK and ▲ ▼ to select TAM SETTINGS.
- 3. Press MENU/OK and▲ 🕷 to select RECORD TIME.

## 12. CARE AND MAINTENANCE INSTRUCTIONS

#### Take care of your telephone

- Your cordless telephone contains sophisticated electronic parts, so you must treat it with care.
- Avoid rough treatment.
- Place the handset down gently.
- Save the original packing materials to protect your telephone if you ever need to ship it.

#### Avoid water

 You can damage your telephone if it gets wet. Do not use the handset in the rain, or handle it with wet hands. Do not install the telephone base near a sink, bathtub or shower.

#### Electrical storms

 Electrical storms can sometimes cause power surges harmful to electronic equipment. For your own safety, take caution when using electric appliances during storms.

#### Cleaning your telephone

- Your telephone has a durable plastic casing that should retain its luster for many years. Clean it only with a soft cloth slightly dampened with water or a mild soap.
- Do not use excess water or cleaning solvents of any kind.

#### NOTE

Remember that electrical appliances can cause serious injury if used when you are wet or standing in water. If the telephone base should fall into water, **DO NOT RETRIEVE IT UNTIL YOU UNPLUG THE POWER CORD AND TELEPHONE LINE CORDS FROM THE WALL.** Then pull the unit out by the unplugged cords.

## CAUTION

## RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERY ACCORDING TO THE INSTRUCTIONS.
