

OCTOPUS, the Smartphone holder for your car. Comes in NFC version (automatic connection system) or standard version, with 3 different fixture options and 360° rotation system, you can adapt the OCTOPUS according to your personal preference.

- On the dashboard, thanks to its high-grip suction cup

- On your air vent

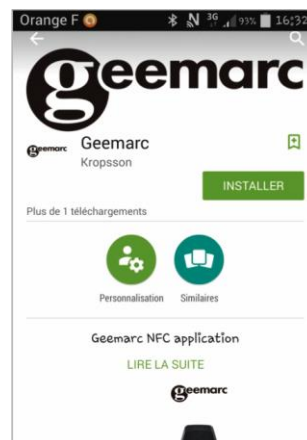

- In your CD Selector

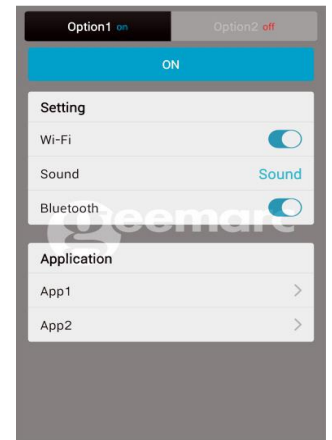

○ 3 steps to use the NFC system

1. By placing your Smartphone on the holder, the GEEMARC application appears automatically.

2. Install the application

3. Set the parameters of the application

After you have installed the Octopus (2), put your Smartphone in the holder. Only the apps selected (GPS, bluetooth hands-free system, music...) during setting the parameters (3) will open automatically to save time and to minimize attention given to your Smartphone whilst driving.

NFC functionalities

The NFC system, or Near Field Communication, is a simple and intuitive technology which lets you use your Smartphone innovatively

NFC works with Smartphones with an Android operating system.

Holds Smartphones with screen from 3.5 to 5.8 inch with or without protective cover
